## CORPORATE MISSION

The University's mission is to establish itself as an exemplary university of internationally acknowledged stature and as a scholarly institution of choice for both students and academics through the pursuit of excellence in teaching, research and scholarship.

It will do so by offering a range of opportunities in education, training and scholarly services, and through the strategic and innovative application of knowledge to enhance the quality of the nation's culture and the prosperity of its people.

# BRIEF INFORMATION

P.KHIDMAT MAKLUMAT AKADEMIK  
UNIMAS

1000168056

Universiti Malaysia Sarawak (UNIMAS) was officially incorporated on 24 December 1992. Unimas is the eighth University, established just after the declaration of Vision 2020. The challenges outlined to achieve this Vision have given Unimas the unique opportunity not simply to respond to change but to become a significant agent and intellectual catalyst of change nationally.

The University took in its first pioneer students numbering 118 in 1993 with the opening of the Faculty of Social Sciences and Faculty of Resource Science and Technology. In 1994 the University moved to its temporary campus in Kota Samarahan. The University's temporary campus at Kota Samarahan was officially launched by the Prime Minister, YAB Dato' Seri Dr. Mahathir Mohamad on Malaysia Day, 31 August 1993.

Over the years, the University has developed rapidly with the establishment of eight Faculties, three Institutes and seven Centres. UNIMAS is a university committed to being contemporary in character and forward looking in outlook in developing its education system. Since its inception in 1992, Unimas has been dedicated to educating students who are not only highly knowledgeable and skilled in their respective fields, but also individuals who are well-rounded, practical as well as rich in culture and positive values. Efforts to enhance the quality of teaching-learning are intensified, supported and strengthened with efforts to improve the quality of the management processes related to teaching and learning.

Quality is the basis of all products and processes at Unimas. Quality-assurance procedures ensure efficient course delivery and student learning. Unimas was awarded ISO 9002 quality certificate by SIRIM as a recognition of the high quality in the management of academic activities from the intake of new students to the award of degrees to graduates.

The University is placing great emphasis on the development of ICT and has successfully integrated ICT in all aspects of teaching and learning as well as administration.

## LIST OF SEMINARS

Pusat Khidmat Maklumat Akademik  
UNIVERSITI MALAYSIA SARAWAK

### ADVANCED GIS SEMINAR 2003

6-7 March 2003

*Merdeka Palace Hotel & Suite Kuching  
Sarawak, Malaysia*

Geographic Information Systems (GIS) employ multi-disciplinary techniques that revolve around geographical datasets in solving real life problems. The incorporation of advanced technologies into GIS further increases the utilization of rapidly growing spatial datasets. Advanced technologies for GIS include virtual reality, artificial intelligence, web-based technology, and high bandwidth telecommunication.

This seminar provides a forum on technical and application areas related to advanced GIS technologies. It will highlight the state-of-art as well as future trends of the advanced GIS technologies, with examples of local applications. The seminar will also present the research and application requirements of the advanced GIS technology for the participating organizations.

- Undertake Technical Educational Turn-Key Projects
- Conduct Specialized Training Courses
- Maintenance of Technical Equipment

## **WORKSHOP ON ENVIRONMENTAL IMPACT ASSESSMENT (EIA)**

**5 - 7 May 2003**

**Belian Room, Universiti Malaysia Sarawak (UNIMAS)**

**Kota Samarahan, Sarawak, Malaysia**

Development of any area will in one way or another, have some effects on the environment. But the effects of development without proper planning would be disastrous. As such, it is crucial for any project to have the effects of such developments to be studied and rectified in time, prior to actual engagement of ground works. Individuals who performed the EIA studies and analysis must be accountable for their reports and should be free from all constraints in executing their duties.

EIA reports should be mandatory before any major developments can be pursued and serve as guidelines for further development by the selected contractors. The responsibilities of the consultants are not only towards the contractors and the government, but also towards the fate of the environment. As is always said, the environment does not belong to us; we are merely caretakers of it, for our future generations.

## **WORKSHOP ON MACROERGONOMICS FOR ORGANIZATIONAL PRODUCTIVITY**

**19 May 2003**

**Hilton Hotel, Kuching, Sarawak, Malaysia**

This one-day workshop is the first of its kind to be conducted in Malaysia. It is specially designed to transfer the theory, method, application and implementation of macroergonomics to organizations. Macroergonomics is the analysis and design of work systems, including jobs, organizational strategy, organizational structure, incentive systems and training programs, in conjunction with technology. It is focused on designing these features of the organization so that human skills and abilities are effectively used to achieve personal and organizational goals. The ultimate objective is a fully harmonized work system that is consistent with the organization's unique sociotechnical characteristics.

## **7TH SOUTHEAST ASIAN ERGONOMICS/ 4TH MALAYSIAN ERGONOMICS CONFERENCE (SEAMEC 2003)**

**19-22 May 2003**

**Hilton Hotel, Kuching, Sarawak, Malaysia**

This joint initiative between Universiti Malaysia Sarawak and the Southeast Asian Ergonomics Society is aimed to promote, exchange, and disseminate information on ergonomics and human factors theory, method, research results and application in the workplace, home, and socio-technical environments. In particular we take an interest in aspects that seek to enhance work productivity, human-machine interaction and performance, product and design quality, management of change in organization and social environments. Ergonomic interventions and design innovations can improve global competitiveness as well as enrich prosperity at home, at work, in industry, and in recreation.

## **ANNUAL GEOLOGICAL CONFERENCE 2003**

**24-26 May 2003**

**Hilton Hotel, Kuching, Sarawak, Malaysia**

The Geological Society of Malaysia (GSM) has been holding its Annual Geological Conference since 1986 and is a national event, which is well attended by geoscientists from academia as well as the public and private sectors.

Malaysia has intensified her development programmes in tandem with Vision 2020. The consequences would be an increase in environmental problems and hazards. Geoscientists contribute their knowledge and expertise to mitigate relevant intensified geohazards such as landslides and slope stability. In addition, geoscientists also help in giving guidelines to relevant agencies involved in resource exploration for development in terms of environmental limits for sustainability. Thus this forthcoming 17th Annual Geological Conference can be a venue for geoscientists to bring forward their findings and experience in some ways relevant to this year's conference theme "Perseverance in geosciences towards sustainable development". Several thematic papers will be presented to highlight the continued contribution of geosciences to sustainable development.

## NATIONAL WORKSHOP ON MANAGEMENT OF INTELLECTUAL PROPERTY RIGHTS

4 - 5 June 2003

*Crowne Plaza Riverside Hotel, Kuching, Sarawak, Malaysia*

The question of granting the full 'intellectual property rights' (IPR) either to the individual who found, acquired and invented a process or to the institution where the personnel is employed while utilizing all the facilities including working time provided by the employer is an issue worthy of full consideration. All established organizations should have a standard and complete procedure in protecting the IPR of their staff, which is obtained from arduous, lengthy and expensive research and development (R&D). These organizations are also responsible in ensuring that these new findings or inventions are promptly patented to avoid infringement of copyrights. Problems in the ownership of the IPR may arise when the responsible individual leaves his current office to join another institution.

This workshop attempts to address issues on the complexity of making the right decisions and explain in details to the participants on the importance of IPR, especially to academics and researchers who are directly involved in R&D. All new findings and inventions, which are commercially viable, should be developed and exploited for the benefit of all parties. Nevertheless, the original inventor should be compensated accordingly with appropriate recognition for his/her effort and creativity.

## TEACH2003-ANNUAL ROUNDTABLE ON TEACHER EDUCATION "STANDARDS OF ENGLISH: TAKING STOCK"

7- 8 July 2003

*Hilton Hotel, Kuching, Sarawak, Malaysia*

The roundtable will highlight issues pertaining to standards of English in Malaysia. It will examine the concept of 'standard English' with reference to the Malaysian context and attempt to raise awareness of the different models and levels of English currently in use. The roundtable will provide opportunities for academics and educators to share their views and experiences with the guest speakers and each other.

## SEMINAR INTRODUCTION TO MOLECULAR EVOLUTION

7 - 11 July 2003

*Kuching, Sarawak, Malaysia*

Epidemiological studies have benefited from new molecular biological techniques. However analysis and interpretation of the data have become increasingly more complicated for biomedical researchers and public health providers.

Molecular evolution provides the concepts and analytical tools to better understand molecular data for assessing specific issues in biomedical and biological research.

This relatively new field combines molecular biology, statistics, and computer analysis to reveal the dynamics of biological entities in time and space.

These concepts allow us to address a broad range of questions from the origin of new pathogens to the assessment of genetic exchange among populations.

## THE 3RD INTERNATIONAL CONFERENCE ON INFORMATION TECHNOLOGY IN ASIA (CITA 03)

17-18 July 2003

*Hilton Hotel, Kuching, Sarawak, Malaysia*

The inaugural conference was held in September 1999, and the second conference in October 2001. This year's conference is held in conjunction with the celebration of Universiti Malaysia Sarawak's 10th Anniversary.

The theme of the conference is "Transforming Knowledge into Insight". Of particular importance are the technologies to acquire and generate knowledge such as knowledge discovery and data mining. The capability to manage knowledge (knowledge management) is vital in providing insights to decision makers in a knowledge-based economy.

This conference provides a platform to bring together researchers and practitioners to share their knowledge and experience as well as to collaborate in addressing the issues of acquiring, creating, using and disseminating knowledge. We hope that this collaboration will lead to insights and ideas in the development of a knowledge-based society with sustainable economic and social development; insights and innovations that benefit the global knowledge society.

Topics and areas include: Community Informatics, Intelligent Systems, Knowledge Network & Management, Knowledge Infrastructure and Knowledge Discovery Applications.

## **JOINT UNIMAS-SARAWAK HEALTH DEPARTMENT MEDICAL COLLOQUIUM: 'MEDICINE IN THE 21ST CENTURY: FORGING THE FUTURE'**

**23-24 August 2003**

**Hilton Hotel, Kuching, Sarawak, Malaysia**

The Faculty of Medicine & Health Sciences, UNIMAS and the Sarawak Health Department have worked together ever since the inception of the Faculty. With the rapid advancement of medical sciences and its related specialties, it is pertinent that recent findings and developments within the fields be shared together. The proposed colloquium will act as an excellent platform for information sharing and exchange of ideas, as well as enhancing networking among those working on the various health and biomedical issues. Furthermore, such a gathering would promote closer and greater collaboration between various institutions.

## THE 16TH MALAYSIAN SYMPOSIUM ON ANALYTICAL CHEMISTRY

9-11 September 2003

Holiday Inn, Damai Kuching, Sarawak, Malaysia

The Malaysian Symposium on Analytical Chemistry (SKAM) is an annual event of the Malaysian Analytical Science Society (ANALIS). The three - day symposium will give the ANALIS members and other scientists the opportunities for networking and presenting their latest research findings and advances in the field of analytical chemistry and related disciplines. The main themes of the symposium are analytical technique development, instrumentation, chemometric, environmental chemistry, quality assurance and control, chromatography and spectroscopy, forensic science and trace analysis, and other related areas in analytical sciences.

## SOCIAL SCIENCE IN A GLOBALISING WORLD - CONTEMPORARY ISSUES IN ASIAN SOCIAL TRANSFORMATION

22 - 23 September 2003

Crowne Plaza Riverside Hotel, Kuching, Sarawak, Malaysia

Globalization poses new challenges to social science as a field of knowledge and as a tool of analysis of contemporary Asian society. It requires social scientists to review the construction of their knowledge base, their repertoire of concepts and theoretical perspectives, including their methodologies, in order to make sense of the far-reaching transformation wrought by globalization at all levels of Asian society.

## NATURAL RESOURCES, ENVIRONMENT AND DEVELOPMENT (NARED) 2003

25-27 September 2003

*Hilton Hotel, Kuching, Sarawak, Malaysia*

The exploitation of the natural resources for socio-economic development of a nation is no longer considered an internal issue for the nation but has become a global issue. Indiscriminate or poorly planned activities have caused tremendous impacts to the environment. To researchers, technical personnel, field managers, academicians and other players who are directly involved in the technicalities of the natural resource and environmental management, there is never enough platforms for them to present and share the latest knowledge created through research. In meeting the needs, the Faculty of Resource Science and Technology, Universiti Malaysia Sarawak, jointly with Sustainable Land Use and Natural Resource Management Programme, Malaysia (SLUSE-M) are inaugurating a Biennial Conference on Natural Resources, Environment and Development (NARED), in conjunction with the celebration of 10th anniversary of the university. The 2.5-day Conference will comprise two symposia; Symposium A on resource sciences, technology and management, and Symposium B on environmental science, technology and management.

## RETHINKING P. RAMLEE

6- 7 October 2003

*Crowne Plaza Riverside, Kuching, Sarawak, Malaysia*

Rethinking P. Ramlee is a seminar with the aim to remember and re-evaluate his contributions to the country especially in the world of arts. The Faculty of Applied and Creative Arts has taken the initiative to gather selected family members, fans, important figures, and researchers from within and outside the country to discuss the various interesting aspects of his works and personality. This seminar is expected to be launched by Sarawak's Chief Minister, YAB Datuk Patinggi Tan Sri Haji Abdul Taib Mahmud.

## **ADVANCING INDIGENOUS SOCIAL WORK**

**20 - 22 October 2003**

**Crowne Plaza Riverside, Kuching, Sarawak, Malaysia**

Professional social work worldwide is guided by a body of knowledge, a repertoire of skills and methods, and a set of values and principles. At the same time, social work practice models and approaches are shaped by the social, cultural, political and economic milieu in which the practitioners operate. As social work in Malaysia is currently gaining recognition for its potential contribution in dealing with challenges and issues associated with social changes, it is pertinent that models and approaches of practice suited to the local socio-cultural milieu are developed and promoted. For this, a concerted effort of social work practitioners, educators, researchers and policy makers is needed to forge a path towards advancing indigenous social work practice.

## **NATIONAL HUMAN RESOURCE DEVELOPMENT CONFERENCE HRDC2003**

**15-16 December 2003**

**Hilton Hotel, Kuching, Sarawak, Malaysia**

This joint initiative between Universiti Malaysia Sarawak, State Government of Sarawak and INTAN is aimed at promoting exchange and dissemination of information on contemporary human resource development theories and practices for knowledge workers at the micro and macro levels. Discussions will focus on issues, challenges and innovations affecting human resource development from various perspectives. This conference also provides opportunities for networking among the participants and institutions involved in the field of human resource development. Directions and future trends in human resource development will also be explored in the conference.
